State of the art

The new RTR Slimline sets new standards in room temperature control. Slimmer than ever before, it combines aesthetics and performance perfectly.

Proven bi-metal technology, a uniquely high 5A switching capacity, a captive screw with threaded insert and a very low depth of only 18.5 mm make it the perfect solution for your customers' residential and business premises – and for you too. You can benefit from the simple installation and reliable technology.

Keep pushing the boundaries with the new RTR Slimline!
